Dear sire or madame,

Thank you for this opportunity to share my thoughts on Net Neutrality. I am a professional web developer and should this bill become law it will adversely affect my career and job opportunities. By allowing ISPs to charge content providers more for what amounts to a fast lane this bill harms small business and start ups by increasing the cost to do business on the internet or start a business on the internet. Please keep our internet open and fair for all of us. Please defeat this bill and move to regulate ISP companies as title ii common carriers to preserve our open and fair internet for generations to come.

Sincerely,
Reuben D Rova, Jr.
