Net neutrality! As if this country hasn't been ruined enough by big corporations...now they are trying to destroy the internet. Do not allow this! How can the FCC even think to disgrace themselves by allowing this? There is no man in our government who is not beholden to big business anymore. We know that these comments are a facade so in advance...thanks for fucking the whole world! Thanks for taking the one truly free place and turning it into you. A place that only money can buy and it totally run by big business and doesn't give a shit about the rest of humanity. Good job guys!
