Stop the cable company's monopoly, consumers have no choice as it is, the rates are outrageous. Apparently the FCC hasn't paid it's blood money to Comcast seeing how SLOW your site is. So this is the future consumers have to pay more for the same speed because cable companies can slow down sites like Netflix, iTunes, and even Google. you had no problem breaking up the phone company, and tried with Microsoft, if you have the power to do that, then why can't you do something about the cable companies. Why do i have to pay almost \$200.00 a month for TV and Internet they have no Competition. there should be regulation on how much the cable company can charge consumers and regulations to not slowdown a company's speed because they don't agree with them or refuse to pay a higher rate for bandwidth. Your the FCC you should be able to do more than let them have Free Reign. Look at what the banks did with no rules, people lost everything. Now your gonna let them cable companies do the same, no wonder the country is going down the TOILET. if you can't stop this then there is really no need for the FCC you should all be fired and dismantled! Just look at the state that the country is in. It's cheaper for big business to dump toxic chemicals in the ocean and pay a fine of 20 or 30 or even 50 thousand dollars than to spend millions to dispose of it properly now if we eat too much fish it can cause cancer or just kill you from mercury the ice caps are melting in 10-15 years from now we will loos Florida and New York City all because Government agencies stood by and did nothing turned the other cheek and now it's too late. Here's a tip for you buy property in Ohio it will be beach front property soon. all because Big Business runs the government, why do have the government if they can't stop even the simple things like this, and government wonders why citizens have no faith in them. it's all most time to move to Mexico so don't build that wall yet soon we will be trying to flee there to get away from the US government's complete stupidity!!
