Do you have any Idea what will happen if you allow TWC and Comcast to do this? You will have single handily allow them to fuck everyone in the ass while at the same time flush the concept of net neutrality down the fucken toilet. What happens if HBO or Showtime wants a little bit more money for their hard earned work in trying to bring me, the user, the best programing they can? Well I hope they like sucking dick because that is the only way they will get any money from them, they literally will have to jack everyone off at TWC or Comcast at the same time in order to get a response. Please don't allow them to do this because I would not like a giant cock up my ass.
