No matter how many comments we actually make, this won't mean anything in the long run. It's just a pointless attempt to fix one of the things gone wrong in this country that the people have no control over. In an oligarchy the masses do not have any say what so ever in what happens in this country, looking at the past few years that's exactly what this country is.

At least I can soon say that I was around the day the FCC changed millions of lives for the worst, for a handful of men to benefit hundreds of millions if not billions of dollars from. It's literally extortion, this country would be so much better off without greedy self justified scumbags such as the people who run the FCC. I am completely for a free and open internet.

I better exercise my freedom of speech before that's taken away as well, have a nice day you fucking scumbags.
