Please do not give these companies anything that they want.

The abomination is selfishness, and the people who run these companies are some of the worst offenders. I already pay almost \$100 a month for Internet, I do not wish it to go up more.

What's worse is that they basically have a monopoly and squeeze out anyone who wants to charge a reasonable price so that we are all forced to choose the lesser of the evils. Just like when we vote.

This whole country has gone to shit. The greed and corruption are appalling and HAVE to be addressed eventually.

We have allowed the government to screw up EVERYTHING else, please let us have just this one thing.

You can send our troops to war and get them killed for no good reason, but don't screw with our guns or Internet.

Thank you. I am available at any time to help. 8039848528.
