The fact that I am even filling this out boggles my mind. To allow the cable moguls to control the internet is absolutely insane. Our country prides itself on being self starters and hard working people. To allow cable companies to charge for something that is already free is at its simplest form communism in my opinion. What is to stop them from passing the fee down to me? It is already too much a month. Whats next, a premium for hulu, or cnn or during a hurricane a premium to get the weather stations?
