You MUST NOT ALLOW this atrocity you are considering passing to come to fruition. The Internet must remain neutral, open, and a level field of play for all parties concerned. The rules you are considering adopting will kill any hope that the Internet has of being a true place for freedom of speech and expression.

You must not condemn it to the painful and agonizing death you are considering. Internet Service Providers, Telecommunication Companies and other corporations will abuse the citizenry of this Nation should you allow them this kind of tyrannical control of the Internet.

I would like to think I can trust you to make the correct decision and re-classify the Internet as a utility, but I think that given the track record of the Government; when it comes to their contributors; they will side with the money and leave the rest of us out to dry.
