Please protect net neutrality. Keep the internet free and unhindered. Do not allow 'fast lanes'. This is not how America should work. You don't pay for a 'faster' library card. The beautiful thing about the internet is that it is open equally and uniformly to anyone. What is to stop ISPs from deciding certain URLs are part of their premium package? What is to stop ISPs from deciding to slow down or ban their competitors websites? If you truly valued capitalism, you would see that it is best served by keeping the internet neutral and free so that the little guys (and the average citizen) has an equal footing.
