

I urge the Commission to do the following:

- (1) Reclassify broadband and cable internet services as Tier II utilities.
- (2) Forbid those Tier II utilities from granting faster access or wider access to the internet.
- (3) Encourage the FTC to break up the current natural monopolies of Comcast, Time Warner Cable, and Verizon Fios.
- (4) Sanction those internet and broadband providers who have received moneys from the federal government for the purpose of improving internet infrastructure, but who have failed to fulfill their expected obligations.
- (5) Refuse and ignore any lobbying propounded on the Commission or any federal legislator by the telecom and/or cable industries. and
- (5) Call for the resignation of telecom shills, like Tom Wheeler, and allow for their replacement by skilled, non-industry personnel, who will look out for the betterment of this Nation, this economy, and the people of this Nation, who should rightfully prevail over the profit mongering monoliths such as Comcast.
