

7521177085.txt

I absolutely do not want big corporations having more control over how I access the internet, only to suit their own needs over the consumer. Mergers are going to cause even bigger monopolies and fewer choices for people. I want our government to look out for it's people and regulate these companies that seemingly do what they want because they have more power with money in Washington. Please represent us, no one else will.
