Re: PS Docket No. 07-114: *Wireless E911 Location Accuracy Requirements*

Dear Ms. Dortch:

On May 29, 2014, CTIA requested a 30-day extension of the deadline for submitting reply comments in response to the Commission's Third Further Notice of Proposed Rulemaking in the above-referenced proceeding.¹ For the following reasons, CCA supports CTIA's request.

The Commission's proposed regime of E911 indoor location accuracy requirements has received considerable attention from industry stakeholders and the general public. A large amount of information was submitted into the record in the initial comment round just three weeks ago.² CCA agrees with CTIA that interested parties would benefit from additional time to file reply comments. As CTIA noted in its request, a 30-day extension would provide commenters with additional time to review the record regarding various technologies, sort through the conflicting information about the technological capabilities, and prepare fulsome submissions—without causing any prejudice.³ CCA therefore asks the Commission to grant CTIA's request to extend the reply comment deadline in this proceeding by 30 days, to July 14, 2014.

This *ex parte* notification is being filed electronically with your office pursuant to Section 1.1206 of the Commission's Rules.

Sincerely,

/s/

Rebecca Murphy Thompson
General Counsel
