Please do not give cable companies even more capabilities to further degrade the quality of their internet access. US citizens already pay more for a lower quality service than other countries, why exacerbate the situation more?

The internet has become an integral part of society. It is the greatest place to express and innovate ideas whether physical or abstract and connects us to the world beyond our borders in a way we have never been before.

Giving cable companies the ability to restrict internet speeds to websites is a horrible first step towards grave and terrible restrictions on the freedom and connection given by the internet.

As a part of the government, you are charged with protecting and enhancing the well-being of the entire population of the US. Please do not betray the people for the benefit of a few companies.
