

7521187659.txt

As a Sign Language Interpreter, in relation not only to the proceedings related to deafness, captioning, and Net Neutrality as a whole, this bill has a massive impact on the freedom of speech of the masses, and more specifically the deaf, who have not only used and enjoyed the internet as it is without the proposed changes herein, but have also blossomed and begun to break out of the restrictions of an inexpressive life without much communication with others due to lack of clear speech patterns or lack of knowledge of Sign Language. With captions throughout the internet deaf and foreign language speakers, the interconnection of worlds unknown can arrive at one's computer. But trying to restrict the uses restricts not only their ability to learn and thrive on their own using the amazing internet platform, but also restricts freedom of speech in a time when the media and powers that be would rather humanity not speak up and truly understand what is going on in this world.

NO to NET NEUTRALITY propositions, and YES to more captioning access! Not just access but QUALITY captioning!
