

7521203477.txt

You are supposed to be protecting the open internet and net neutrality, what the hell are you doing?  
ISPs should be IUPs. Broadband should be reclassified as the UTILITY that it is. I'm sick of these greedy companies forcing us to fight them every single year over this ridiculous nonsense. Put an end to it now, do the right thing and classify broadband as a utility or you've failed to do your job because you chose to bend a knee to corporate dollars.
