Dear Sir/Madame,

HAVE YOU NO DECENCY?

Have you decided to sell the last shred of your dignity and soul??

Have you no concern for the people and constituents your Commission has the responsibility to protect?

What happened to our ideals, our goals, our values of fairness, truth and honest competition for the betterment of all?

This ever-accelerating sale of souls and values, of corruption and cronyism, is killing our country and will drive it completely into the ground!

Net Neutrality has remained the last true venue for freedom of speech. Internet is how we communicate now - what is to prevent the slowing of the voices of dissent if neutrality is gone? Internet has become a source of great entrepreneurship. What is to become of our anti-trust laws, when the deepest pockets get preferential access to disseminate their products?

I understand it benefits the rulers to turn the rest of us into a mewling herd of numb consumers, but have you no sense of responsibility? have you no education to see this coming? have you no fear of what you are letting take place??
