Do not allow net neutrality to cease to exist. This is the wrong thing to do ! Comcast Verizon and Time Warner are basicly bribing their way for this to happen so they can control the usage of bandwidth and charge customers more money for a service that should remain as it is it is now an open free market and the last one available to the public.

Take note of how the rest of the world sees and distripute the internet and make the right choice to not put further financial burde on the citizens of the USA. Do not allow these corporations to lobby/bribe to get the system set up the way they want it. It will only stifle economical growth and make these mega companies much more haniously wealthier than they already are. Greed is the only reason these companies want this to be!!
