i am here to tell you the fcc not to let, verizon and comcast & companies of such like, have a monopoly on net speeds. i am writing you here to tell you that it is not fair & that all data must be treated equally. the internet is not broken. stop trying to fix it! no one needs to pay for faster streaming. NO ONE SHOULD BE ALLOWED THAT RIGHT. IT IS WRONG. big companies do not need the right to have a more costly "hyper-speed" service. this is wrong and not needed. we do not need to give them this much power. net neutrality must be maintained. cable companies have washington in their pockets already and do not need more government influence. on may 2, 2013 our president picked tom wheeler (a former top lobbyist for cable and wireless companies) to be the next chair for the federal communications commission. YES THE GUY WHO USED TO RUN THE CABLE BUSINESS LOBBYING ARM IS NOW IN CHARGE OF THE AGENCY REGULATING IT...i tell you what, this is exactly why the fcc has now put its' nose into net neutrality and needs to be told no. so to this i say with all of my heart and soul <NO! NO! NO! NO! BAD FCC! GO LAY DOWN! DROP THIS NET NEUTRALITY IMMEDIATELY! THAT IS NOT YOURS TO PLAY WITH. BAD FCC. NO NO.> fcc you will not get away with this.

i have friends, neighbors and fellow american friends all over the world who i am giving this address to and who are going to write to you and who are going to tell you the fcc: we won't stand for this, it is idiotic and we will not bend over and let them give it to us in places we don't want it, in ways we don't take it!!!!
