I realize that we little people don't spend any money lobbying for our side of this argument, but you really are supposed to work for US. The big Co.s like Comcast & Century Link already get away with giving us LOUSY service & speeds, but this would just be too much. I live in Wyoming!! I would probably have to go back to the Pony Express. Do you how much they would not care about me & my neighbors? Less than you do! & that's saying something.
