Internet providers should not be able to:

1. Continue to have the monopoly on coverage that they currently do. Consumers should be able to choose their provider based on service and price, rather than having to choose from one provider or have absolutely no service at all. How can that possibly be legal?
2. Be able to limit / increase / censor / block websites for any reason especially based on how much users pay. Seriously. Faster or super fast? Give me a break.

Please, stand up for all Internet users and our right to communicate.
