You cannot let this illegal, unconstitutional, monopoly-encouraging insanity to be allowed. Net Neutrality is the ESSENCE of a truly free press and the axiom of the information age. A tiered system gives corporations and federal governments the ability to censor, block, distort and disservice the free exchange of thoughts and ideas on the internet. It also further enhances the monopoly status of ISPs who enjoy limited if any competition. If you allow net neutrality to cease existing you are sounding the death knell of the information age and heralding a horrible Orwellian future where freedom of speech is limited to those favoured of the state and its corporate financiers.
