In the matter before the commission under proceeding number 09-191, I urge the commission to preserve net neutrality by disallowing multi-tier service by internet providers. The introduction of a 2 tiered system in which broader service is demands a higher price is precisely the sort discriminatory practice that the commission should prevent. Internet providers, specifically Comcast and Time Warner, have already demonstrated parasite behavior with towards internet users such as Net Flick, small businesses or even their own customers.

I strongly urge the commission to preserve net neutrality by disallowing this practices.
