Since the director of the FCC is most obviously out to fatten his own pockets and push his own agenda (given his former job), I ask that you please keep the internet as is. Why don't you worry about increasing the strength of our country's internet infrastructure? We have worse internet than fricken Estonia. What the hell is up with that? This country is fucked. The power that money and lobbyists hold is way too great and extremely unfair to the average American with true values not motivated by monetary gain. If you allow these monopolistic companies to offer two rates of internet speed, the companies will jack up prices and screw more people out of more money.

LEAVE THE INTERNET ALONE OR THE CITIZENS OF THE USA WILL RAGE SO HARD YOU WILL WISH THAT YOU NEVER FUCKED UP IN THE BEGINNING.

PLEASE KEEP THE ONLY NON CORRUPT PART OF OUR COUNTRY NON CORRUPT.

Thanks
