Cable companies as they are represent monopolies. I have NO CHOICE for my internet at home, I can either get Comcast, or get DSL. Which is terrible and archaic. Why? Because no one else will service my area. This needs to be stopped, not expounded upon. I comment that all major ISP'S, should be forced to split apart, much like what happened to Rockefeller oil. There is no competition so there should be no AT&T, How about AT&D, AT&U, and AT&GetUsOurFreedomBack.
