Please do not succumb to pressure exerted by cable providers and the telecom industry. Preserve Net Neutrality. The damage to individuals, consumers and start-ups will be immeasurable if the internet becomes a 2 class system in which only the rich may afford competitive access to broadband. However tempting it might be to succumb to lobbying by big business, do NOT sell out the American public. This is a highly important issue. DO NOT ALLOW a 2 tier system. It is too easily manipulated to leverage advantage and exact higher fees at the whim of large mega-carriers. Please listen to the voice of the people and do not neglect your fiduciary responsibilities.

Please protect the American Consumer from the subsequent effects of monopolization and price gouging. Preserve Net Neutrality. Help foster equal access and an environment where healthy competition and market improvements may flourish and are not blocked by only the super big.

Thank you.
