Why would you let two companies that obviously are the very definition of monopolies merge to become the biggest service provider in the country.

These two companies are dead last when it comes to customer service and you are going to let them merge to become an even bigger service provider that doesn't care about the customers and know they will keep paying their monthly bill because they have no real options.

Stop protecting these bohemeths that in turn rape their customers because they have done everything to stop the spread of real competition.
