This the same tactic that was used by the Nazi's when they took over all forms of information at that time..

This isn't any different except now it is happening in America and history is repeating itself.

All this is, is "Strong Arm" tactics by big corporations trying to Pay off Government Officials for bogus laws that benefit them and restrict the consumer (The People) free access to all "Public" information..

How is this not Against the law and where is our so called Justice Department who is supposed to protect, "The People" from corruption such as this attempt on, Net Neutrality freedom??

Is the FCC a part of the problem or are they also being, "Paid Off"??
