I'm commenting to ask that you take steps to protect and promote an equal and open Internet. Please classify broadband as a telecommunications utility and allow it the protection it deserves. Doing so would give the FCC the clear authority to adopt strong Net Neutrality rules. And it would enable the agency to intervene whenever ISPs harm the open Internet through discriminatory practices. Please don't bend to the will of the few, but powerful corporate cable lobbyists who would have you remove these protections. Listen to the overwhelming voice of the people and act to protect this important technological, economic, and social resource. Thank you.
