I'm sick of you, the government, trying to destroy and free liberties that we have left. Killing the net neutrality ruling does not give gains to the small mom and pop shop trying to make a living on the internet. Instead it puts them in the bottom of the pile where they will never be noticed because of the slow and fast lanes that will transpire if this ruling goes into affect. I don't want to pay for an internet service that charges everyone else to pay for content that I see. NO, its stupid, unfair, and unjust. Just another way big companies can charge another buck to make billions more on top of what they already make. ISPs are common carries and thats how they need to be classified as. Listen to the American people and what they have to say. Stop being belligerent fools on this matter. Sheesh!
