I already have had my internet service speed greatly reduced and the price raised even though I was promised I would continue with the same service at the same price after the buy out. The current provider says I have a lower price than available which is a lie since they offer so called faster gaming speeds for \$19.99 and I just got a mailer for something supposedly really fast for \$29.99. I can't even use my phone service because as soon as I use it it breaks up so. I had great service before the sell out. I can only imagine how you allowing a double standard for fast vs slow will effect my speed/service for those of us who don't have access to a T1 or fiber. For some the internet is a lifeline or a way to telecommute to work. It's not a luxury, but a necessity. Please do not ruin the internet for me and so many others that depend on it.
