The Internet..down to the wire..was originally built by tax payers. Why does the FCC believe everything the people of this country pay for belongs to quite literally a select few? We the tax payers are also providing the official salaries of those persons on this board!

WE DEMAND the board follow it's original mandate to protect this service from antitrust predators using our huge investment as a subsidy to fleece the tax payers and divide those able to now PAY (on top of taxes) to receive high speed Internet, information and opportunity promised to all.

This infrastructure most certainly does NOT belong to a few board members paid by lobbyists and especially not the domain for ex cable lobbyists to control and give away. Amazing. The corruption is so obvious as to be embarrassing. The brazen in your face change of ownership - quite literally a crime.

The Internet belong to Americans. Young start up technologies will be squashed.

The people living on the outskirts will be excluded. Those living from pay check to pay check, ignored. Information will be sanitized and limited. Our constitution established the fact that information and a well informed citizenship is fundamental for America to work. Who gives this board the right to whisk that away on a bribe?

WE DEMAND AN INVESTIGATION OF THOSE ON THIS BOARD WHO'S CONFLICT OF INTEREST WILL AFFECT ALL OF AMERICA.

HOW DARE YOU BELIEVE THAT POLITICAL WIND GIVES YOU THE RIGHT TO CHANGE THE ENTIRE MANDATE OF NOT JUST YOUR BOARD BUT OF THE CONSTITUTION ITSELF?

A crime is still a crime no matter how many friends in high places you have. I believe it behooves the board to scrap your ill conceived theft of public assets and start again. Europe has made the right decision. Start there.
