I beg of you, please do not tamper with the free and open internet! The combining forces of these monopoly avoiding cable companies such as TWC and Comcast will soon mean the limiting of free information to the public. I fear that allowing these companies to circumvent net neutrality will be another in a long line of freedoms to be stripped from the American people. Not to mention a legal yet immoral way to get around the existing monopoly laws.

We all know right from wrong. Even the lobbyist pushing, cajoling and buying their way into laws that exclude the many for the benefit of a select few. And as a member of the human race we cannot allow money to dissuade our moral compass! Please, do the right thing!
