This entire thing is a ludicrous idea. Keeping the internet completely neutral is the only way we as americans and as people of this planet can share mass amounts of information in reasonable amounts of time. By taking away internet neutrality you are infringing upon the basic human rights that is set forth by our government for freedom of speech and many other rights. Please i implore you...Pull your heads out of your asses. I hope you're not corrupt to the core america but this will be a shining moment in history don't be on the side we look at as nazi's 100 years down the road.
