I am Extra Class Amateur licensee N6ZI. I have been an amateur licensee since 1959. I am against RM-11708. This Proceeding is unnecessary, unjustified, and presents a threat to low powered and, especially, emergency communications. Strong wideband, and especially automatic stations are allowed by this Proceeding to operate in portions of the Amateur spectrum now mostly used by cw stations of this type. The potential interference to these stations is increased by this Proceeding potentially leading to a loss of unique portable/remote/emergency communications links. This could result in loss of property, injury, or worse.
