**Re: Expanding the Economic and Innovation Opportunities of Spectrum through
Incentive Auctions, GN Docket No. 12-268**

Dear Ms. Dortch:

On June 13, 2014, Joan Marsh, Michael Goggin, Jonathan Perez and the undersigned of AT&T Services, Inc., and Michael Kearns and Lili Dworkin, of the University of Pennsylvania, met with Gary Epstein, Evan Kwerel, Edward Smith and A. J. Glusman of the Incentive Auction Task Force and Brett Tarnutzer, Melissa Dunford, Martha Stancil and Sasha Javid of the Wireless Telecommunications Bureau, and Julius Knapp, Aspasia, Paroutsas, Matthew Hussey, and Bob Weller of the Office of Engineering and Technology on the above-referenced proceeding. Paul Milgrom, Kevin Leyton-Brown and Ilya Segal of Auctionomics, Inc. participated telephonically in the discussion.

During the conversation, Dr. Kearns described a study that sheds light on the scope of broadcaster participation needed at various clearing targets. The study examines various scenarios both with and without the Commission's domain constraints and highlights both the possibilities and the challenges of the repacking process. The study is designed to illustrate the structure and constraints of the solution space of feasible repackings. Specifically, the analysis is "mechanism free," in that it identifies constraints that must hold, regardless of the auction mechanism chosen or the prices offered to broadcasters. The attached presentation was used to facilitate the discussion. The Kearns/Dworkin white paper is also attached for inclusion in the record.

In accordance with the Commission's rules, this letter is being filed electronically with the Secretary for inclusion in the public record.

Sincerely,

/s/ Brian J. Benison
