Please consider this our plea to keep RFDTV on the air via all mediums, including cable, satellite, streaming, antennas, and all other sources. We count on RFD to deliver timely important updates for Rural America, as well as really good programming that is in correlation w/ a good value system for our generation and future generations. W/O RFD, I see no need to have a television in my home; it's all we watch, as the big networks air horrible programs that send bad messages and contain a lot of sickening sexual content, murder, torture, abuse, etc. Isn't there room for 1 channel that the whole family can watch? Our country was built by the American Farmer/Rancher, and w/o them, we will not survive. Please keep the infrastructure of our country STRONG so we can survive for many hundreds of years down the road. May God Bless America & RFDTV ... Salute!!!
