14-57. I watch RFD - TV and I support the American farmers. I understand that ComCast has removed RFD - TV from their line up and instead replaced AlJezzerah. I do support rural America and the American farmers and RFD-TV. I will only support the transfer of licenses IF we are guaranteed that rural America will be represented by keeping RFD-TV on our existing cable providers. This is excellent family programming and provides information helpful to American farmers and those of us supporting American farmers. If ComCast were to review the ratings and growth of RFD-TV, I'm sure they will see that I'm not alone in supporting RFD-TV and the American farmers. We have basic values supporting the USA and the Constitution, which is far better for the USA than the programming on AlJezzerah.
