FCC,

I RESPECTFULLY ASK THAT RM-11708 BE DISMISSED.

I have studied RM-11708, and based upon my 51 years of amateur radio experience, and 35 years of experience as a FCC licensed Broadcast Engineer, I'm convinced that the proposal will increase radio interference. (my FCC licenses include: Amateur Extra Class license K9OM and FCC First Class Radiotelephone and General Radiotelephone licenses)

RM-11708 is a very poor proposal and will cause serious radio interference to many modes of amateur radio. As a long-time member of the ARRL, I'm very frustrated and disappointed that the ARRL did not seek the advice of it's members before submitting RM-11708.

I respectfully request that the FCC dismiss RM-11708.

Sincerely,  
Richard Van Zandt- K9OM
