Where I live there is -basically- an ISP monopoly. Bellsouth (ATT) is no longer accepting new customers in this area, and all that is left (other than the horrors of satellite, which are in -no way- a comparison or alternative to cable broad band Internet!! If anyone tries to say otherwise, they are a bold faced liar.) is Cable TV of East Alabama. The owners of Cable TV of East Alabama have only recently increased Internet speeds up to 15 mbps and started offering Internet-only options, and -those- are between \$92 and \$112 a month - -Just- for Internet!

It is abundantly clear that they are greedy to the point of ethical criminality. We beg you down here in Alabama. -Please- do not give them another weapon of extortion. Please do your job of protecting us. Be the good guys.
