

7521335248.txt

Hello,

I am opposed to RM-11708.

As presented, it should be withdrawn.

There is no merit to it.

I am not saying that some change is not needed but I see no evidence of a complete analysis of the proposal.

I see no evidence of any expert testimony taken.

I do see that I will be interfered when I start to use RTTY and PSK31.

Furthermore, I am left with the impression that the main reason for RM-11708 is for a select and small group of hams to use the ham-bands to get, for free, Internet connectivity.

Because this same connectivity is available commercially, the ham-bands should be left for the intended hobby use and not so somebody can download movies.
