Please do not allow Time Warner and Comcast to merge. This is exactly what anti-trust laws are designed to do. A huge swath of the nation already has only ONE ISP to choose from, making it impossible for capitalist and market forces to keep prices down.

Already, we Americans pay waaaaay more than other countries for SIGNIFICANTLY slower speeds. For example, in Hong Kong and Seoul, \$25 and \$30 (respectively) will get you 500 Mbps each month. In American, you'd have to pay \$115! (source: http://www.huffingtonpost.com/2013/07/24/us-internet-speed_n_3645927.html)

We need more competition, not less. Do not allow these two behemoths to merge.

Thank you.

Eric Nanneman
