Gentlemen

Please make sure we can continue to receive RFD-TV and rural-TV And all the programming for rural America. The cable companies are trying to work all the programming for the rural America off the air .We are losing our most valuable asset when we lose these channels. We enjoy the down to earth shows and the honest and decent programs that we receive on these channels. The cable companies are only interested in stupid shows that don't even reflect true life. They project a line-up of indecent and violence that are making our children zombies with out any thought of real life. We respectfully ask that you make sure we will still have RURAL-TV and RFD-TV and all the rural programming that we receive now .We really enjoy shows like Larry's Country diner, and the music shows that you can't get on cable.
