Voice Services Comparability Report

Pursuant to 47 C.F.R. § 54.313 (a) (10) Dubois Telephone Exchange, Inc., ("DTE") is in compliance with the requirement that voice services is no more than two standard deviations above the national average urban rate for voice service of \$46.96 as specified in Public Notice DA 14-384 issued on March 20, 2014. DTE's current total local end-user rate¹ for Wyoming of \$ 32.01(which includes a local fee of \$31.76 and a mandated state fee of \$.25)and for Colorado of \$14.36 (which includes a local fee of \$14.00 and a mandated state fee of \$.36) is not above the standard deviation as specified in the USF/ICC Transformation Order.²

¹ Local End User Rate as defined in USF/ICC Transformation Order 26 FCC Rcd at 17751, Para. 238

² USF/ICC Transformation Order, 26 FCC Rcd at 17694, Para. 84 (footnote included) "The standard deviation is a measure of dispersion. The sample standard deviation is the square root of the sample variance. The sample variance is calculated as the sum of the squared deviations of the individual observations in the sample of data from the sample average divided by the total number of observations in the sample minus one. In a normal distribution, about 68 percent of the observations lie within one standard deviation above and below the average and about 95 percent of the observations lie within two standard deviations above and below the average."
