RFD TV is the only channel available to me to via Direct TV, Cable or broadcast television that provides me the information I want about rural living, agriculture, etc. If RFD TV is removed from Direct TV or cable I, and everyone else, will lose a valuable resource about agriculture and rural living. As the United States becomes more urban RFD TV becomes more relevant, not less relevant, as it provides a channel for Urban consumers to learn how their food is raised and other aspects of rural living.

Thank you for your time.
