We subscribe to dish network service specifically to get RFD TV. Their programming addresses our lifestyle, and we would be very unhappy if mergers cause these stations to be dropped. Please, please take into account the huge number of rural residents who depend on the information and clean programming of RFD TV and Rural TV. They are the only sources of agriculture, horse and cattle shows, and these remain an important component of life in this country. Why would you ignore us?? Don't take away our favorite channels.
