I wish to support RFD-TV, and I am concerned about the mega-mergers between Comcast-Time Warner, and eventually between AT&T and Direct TV. Direct TV is the only carrier in our area that broadcasts RFD-TV, which provides wholesome family entertainment, including the best country and blue grass music shows in the USA. I wish to remind the FCC that Florida is either #1 or #2 in beef cattle production in the USA. Most people believe Florida is Disneyworld and Miami Beach, but do not know that most of Florida, including central Florida where we live, is 90% farm and agriculture land, along with some of the most beautiful horse country in the USA. Many horses racing for the Triple Crown this year winter and train in the Ocala FL area. We need the vital agricultural programs RFD-TV provides us here, especially with the current blight affecting our orange groves right now! Please support this vital independent network, please!
