Rural Free TV does NOT need to be cancelled because of the merger between Direct TV and Comcast/ATT. RFD TV is extremely educational for those in the agricultural fields and those in cities who need to have access to knowledge of the farming industry, beef industry etc. in order to make knowledgeable decisions that affect daily life.

Many channels carried by these companies show total garbage. Yes, that is just an opinion. But, RFD TV is truly valuable. I am a city lady turned country farmer/cattle owner. I have learned so much from this channel. As a past teacher of 20 years, I can't tell you how many children in 2nd grade city schools honestly believe green beans come from cans. How in the world can you, FCC, justify broadcasting Al Jazheer (however it's spelled, I don't really care), and discontinuing a show that has true values and meanings. That thought is totally sickening.
