

7521340235.txt

I'm a city boy living in rural area now with no cable TV company service in the area, so only satellite TV here in the extreme eastern San Diego county CA area, and I watch RFD-TV almost exclusively other than local channels for local news and weather which is mostly independent such as KUSI-TV in San Diego CA.

I am going to continue to watch RFD-TV if cable and satellite TV companies continue to keep RFD-TV in their channel line-up. I do hope the various cable and satellite TV companies do NOT drop RFD-TV now or in the future.
