I live in a rural area and we need to have programming like this for people who need to know where their food comes from and maybe learn some things from back in the day and be entertained with quality programming. We don't need to have some of these new programs when we already have CNN, FOX, and etc. Please take into consideration that we need to keep RFD-TV in programming as it would be beneficial to know and learn where our products come from. Even though some of the companies are Urban area don't you think that these people need to know where their food comes from and maybe learn how to grow some food where they live.
