As Comcast and Time Warner move forward on this merger, I would like to state that it is important for these cable companies to consider their subscribers. We currently live in the greater Atlanta metro area and subscribe to Family TV which carries RFD TV. Even though we live in an urban area, our "roots" are rural and this tv channel is important to us. A spokesman for the Comcast Corporation says that they are selecting programming for the majority of their subscribers who live in urban areas. It is sad that Comcast has made a sweeping generalization about what people watch based on where they live, not on what they actually like to watch. There has never been a poll conducted by our cable company to see what we like to watch. We fear that the merger will limit our channel selection even more. We urge you to require that the Comcast, Time Warner merger include RFD TV. We hope that you act in good conscience to consider this independent television station and their viewers.
